ADVANCE.AI is a data-driven financial technology company with multiple offices in the APAC region. In our quest to build a better financial world, one of our key goals is to revolutionize the credit system by creating a more holistic, accurate, and democratic alternative to existing credit scoring methods.

Combining the best domain knowledge in big data, artificial intelligence, and credit rating technology, ADVANCE.AI brings the next generation of data centric platforms to transform the financial service industry in Asia. Our core product offerings include credit scoring, anti-fraud detection, facial recognition, and AI as a Service.

Advance.AI is built and backed by experienced and successful entrepreneurs and investors in Singapore, China, and US who are from top-tier schools like Stanford, CMU, UIUC, Tsinghua, Fudan, SJTU, NUS, and NTU with rich industrial experiences from Goldman Sachs, Farallon Capital, Two Sigma, Amazon, Accenture, Tencent, Baidu, and HSBC.

We’re looking for a Web Developer to join our high performing team. If you’re looking to be a part of a team who tackle real-world financial problems, Advance.AI might just be the place for you! Work alongside world-class talent and join us as we use sophisticated data and analytics to make a change in the financial world.

**Job Responsibilities**

- Work closely with software engineers, product managers, and QA to build creative and engaging websites
- Develop high-quality, reusable, testable, and well-structured code using the latest front-end technologies
- Troubleshoot and resolve issues within existing codes
- Enhancing the efficiency of the web development team while attracting a larger target audience to their digital platform
- Fine tune website performance to ensure smooth user interactions

**Job Requirements**

- Bachelor’s Degree / Master’s Degree in Computer Science / Electronic Engineering / Information Technology
- At least 1-3 years of relevant working experience
- Good mastery of HTML, CSS, JavaScript, and other web development technology
- Familiar with mainstream frontend framework, with hands-on experience in Vue or React project development.
- Familiar with various mainstream web browsers and the development and adoption of mobile browsers
- Good understanding of HTTP protocol and TCP/IP, and is familiar with debugging tools
