COMPANY OVERVIEW

ACM Biolabs Pte LTD is an innovative biotechnology company situated on the NTU campus. We use a revolutionary new technology to advance the boundaries of human health in the field of vaccinations and antibody therapeutics (www.acmbiolabs.com).

Currently, we are recruiting for Protein production and purification specialist to aid us in advancing this technology forward to market and helping to bring ACM into the forefront of this commercial space.

We are looking for enthusiastic and motivated people who are experts in the field of biotechnology, manufacturing, and protein science.

**Protein Production and Purification specialist**

**POSITION DESCRIPTION**

This is predominately a lab-based position. The candidate will lead projects working on the design, expression and purification of key antigens used in our vaccine research. ACM has both internal projects and we also work with external partners to generate new products for human health. The applicant will be a part of these projects and expected to keep up to date records, report to project leads and external partners.

Knowledge of the following would be required –

- Cell culture, specifically insect cells and E.coli, yeast and other cell lines are a bonus
- Experience in establishing downstream process for proteins (e.g., using FPLC AKTA or other systems)
- Troubleshooting of issues with protein purification
- Knowledge of cloning and microbiology
- Experience or knowledge of GMP process of Protein Production for Biopharma and Food would be advantage
- Experience in improving productivity and scalability of proteins would be beneficial
- Good record keeping

**POSITION REQUIREMENTS**

- PhD in a relevant field, Biochemistry, chemical biology, etc
- Bachelors/Masters in a relevant field with at least 4 years’ experience

To apply, please email your CV and cover letter to tcornell@acmbiolabs.com by 24 July 2020.
