**Job Title:** Member of Technical Staff-II  
**Job Category:** Engineering  
**Location:** Singapore  
**Position Type:** Full Time  
**Level:** 2 to 4 years  
**Date Posted:** February 2020

### Job Description

**OUR IDEAL CANDIDATE**

You have a deep interest and passion for technology with a transformation mind-set. You enjoy owning new responsibilities and working with people who will keep challenging you at every stage. You have strong problem solving, analytic, decision-making and excellent communication with interpersonal skills. You are self-driven and motivated with entrepreneurial passion and desire to work in a fast-paced, results-driven agile environment with varied responsibilities.

**ROLE AND RESPONSIBILITIES**

- Write a high quality, well-designed and maintainable code.
- Design and implement the next generation architecture of Almug's AI Product
- Analyse the product requirements and develop functional and design specifications.
- Design and implement needle-mover features with simplicity and elegance

**QUALIFICATIONS AND EDUCATION REQUIREMENTS**

- BS/MS in Computer Science or equivalent.
- Proficiency in, at least, one modern programming language such as Java, Python, C#
- Strong understanding of algorithms, data structures and basic information retrieval concepts
- Must be effective in working both independently and in a team setting
- Test and debug programs periodically to ensure it produces the desirable results.

**ADDITIONAL NOTES**

Knowledge of Elastic Search, Solr, Javascript
