Developer

SOAS specializes in accounting, corporate secretarial & compliances, consultancy & advisory on tax planning, corporate strategy, fund raising and wealth management with global reach.

We are looking for a software engineer/developer to join our growing development team. Currently, we are in the midst of developing an exciting suite of business management applications and we are just getting started.

The ideal candidate is one who thinks on his/her feet and has experience with multiple coding languages. Have strong analytical skills on top of technical ones and is able to communicate clearly with other team members. Must be comfortable working in a fast paced, unstructured environment. A “Can-Do” attitude is also a must.

Responsibilities

- Analyse user requirements
- Create innovative, scalable, fault-tolerant software solutions for our clients and customer base
- Work closely with project managers, UX designers, other developers, systems analysts, graphic artists, and sales and marketing professionals
- Write and test code to ensure compatibility and stability: refine and rewrite as necessary
- Create clear technical specifications
- Expand existing software to meet the changing needs of our key demographics

Skills and Qualifications

- A Bachelor’s Degree in Software Engineering or Information Technology or any relevant fields
- >2 years’ to 8 years’ software development or programming experience
- Experience with Javascript(Angular preferred), Python on Django, or Java
- Experience working with Linux & Microsoft environments
- Comfortable working with relational databases e.g., PostgreSQL, MySQL, etc
- Experienced with GIT
- A meticulous and organized approach to work
- A logical, analytical, and creative approach to problem-solving
- A thorough, detail-oriented work style and a “Can-Do” attitude

If you fit the bill, send your updated resume to kelvin@soas.com before 20th December 2019.
