COMPANY BACKGROUND/CULTURE

The Samsung Group is a multinational corporation headquartered in Samsung Town, Seoul, South Korea. It is the world's largest conglomerate by revenue with annual revenues of US$138.14 billion in 2010.

The Samsung Group is composed of numerous international affiliated businesses, most of them united under the Samsung brand including Samsung Electronics, the world's largest electronics and information technology company.

Samsung Electronics has been the world's most popular consumer electronics brand since 2005 and is the best known South Korean brand in the world. Samsung Group accounts for more than 20% of South Korea's total exports and is the leader in many domestic industries, such as the financial, chemical, retail and entertainment industries.

Samsung Asia Pte Ltd. has been a global consumer electronic and information technology products manufacturer since 1938. The company manufactures various electronic products, such as mobile phones, LCDs, laptops, DVD players, digital camcorders, laser printers, fax machines, and plasma and flat screen TVs. It specialises in the manufacturing of digital traffic signaling equipment and fire and burglary alarm apparatus. Additionally, it provides several home appliances, such as washing machines, refrigerators, air conditioners and vacuum cleaners. The company also manufactures semiconductors, communication equipment and computers and its peripherals.

KEY RESPONSIBILITIES

- Discuss, conceptualizing and validate business requirements with users
- Translate business requirements to functional requirements for technical team to commence development
- Advise or propose to business users on process improvement through the use of IT solution
- May create detailed design and implementation specifications for web applications/solutions and provide consultation to prospective users
PROFESSIONAL COMPETENCE / QUALIFICATIONS

- Posses a Degree in Computer Science, Multimedia or related disciplines
- Knowledge and exposed to software development using MS.net or Java Technologies.
- Creative mind towards conceptualizing graphic user interface (GUI).
- Familiar in developing Mobile Web Applications using Android, MS.net framework 3.5, Web Services, PHP, MySQL, Adobe Flash and IIS 6.x / IIS 7.x
- Team player, ability to collaborate effectively in an international, multi-cultural environment

COMPANY BACKGROUND/CULTURE

The **Samsung Group** is a multinational corporation headquartered in Samsung Town, Seoul, South Korea. It is the world’s largest conglomerate by revenue with annual revenues of US$138.14 billion in 2010.

The Samsung Group is composed of numerous international affiliated businesses, most of them united under the **Samsung** brand including Samsung Electronics, the world's largest electronics and information technology company.

**Samsung Electronics** has been the world's most popular consumer electronics brand since 2005 and is the best known South Korean brand in the world. Samsung Group accounts for more than 20% of South Korea's total exports and is the leader in many domestic industries, such as the financial, chemical, retail and entertainment industries.

Samsung Asia Pte Ltd. has been a global consumer electronic and information technology products manufacturer since 1938. The company manufactures various electronic products, such as mobile phones, LCDs, laptops, DVD players, digital camcorders, laser printers, fax machines, and plasma and flat screen TVs. It specialises in the manufacturing of digital traffic signaling equipment and fire and burglary alarm apparatus. Additionally, it provides several home appliances, such as washing machines, refrigerators, air conditioners and vacuum cleaners. The company also manufactures semiconductors, communication equipment and computers and its peripherals.

KEY RESPONSIBILITIES

- This position will focus on managing QA & Testing with internal & external consumer (B2C) developers for Samsung’s Android platforms on Smartphone and Tablet devices for consumer apps/services (B2C) with secondary responsibility to support enterprise developers (B2B).
- Manage issue identification and resolution for developers via online developer portal and direct communication with developers.
- Manage formal application testing and certification for submitted applications.
- Provide support to partners to register on developer systems, download development tools and tutorials.
- Manage development inquiries from application developers, providing proactive advice, bug fixes, technical information online and when required, on-site for developers.
- Support technical queries from potential contents & services partners as needed.
- Proactively provide developers with clear design and development guidelines and examples of best practices for application development on Samsung’s platforms and devices.
PROFESSIONAL COMPETENCE / QUALIFICATIONS

- Candidates should have sufficient software development or development support capabilities and experience to easily identify and fix bugs in software code
- In-depth knowledge of Android platform and Software Development Kits (SDKs), preferably with experience with UI, mobile streaming, Unity Game Engine, content protection (DRM)
- Also prefer candidates with solid understanding of mobile enterprise development, integration, and testing (Unified messaging, Virtualization, Cloud, Encryption, VPN, networks, etc…)
- Excellent written and verbal communication skills
- Candidates should “live and breathe” the latest digital trends (particularly within a specific relevant category – i.e., music, games, photo, etc), and be both intellectually curious and confident in researching new business concepts
